Equipment

Coins

Characters often find coins on their adventures and can spend those coins in shops, inns, and other businesses. Coins come in different denominations based on the relative worth of their material. The Coin Values table lists coins and how much they're worth relative to the Gold Piece, which is the game's main coin. For example, 100 Copper Pieces are worth 1 Gold Piece.

A coin weighs about a third of an ounce, so fifty coins weigh a pound.

Coin Values

Coin	Value in GP
Copper Piece (CP)	1/100
Silver Piece (SP)	1/10
Electrum Piece (EP)	1/2
Gold Piece (GP)	1
Platinum Piece (PP)	10

Weapons

The Weapons table in this section shows the game's main weapons. The table lists the cost and weight of each weapon, as well as the following details:

Category. Every weapon falls into a category: Simple or Martial. Weapon proficiencies are usually tied to one of these categories. For example, you might have proficiency with Simple weapons.

Melee or Ranged. A weapon is classified as either Melee or Ranged. A Melee weapon is used to attack a target within 5 feet, whereas a Ranged weapon is used to attack at a greater distance.

Damage. The table lists the amount of damage a weapon deals when an attacker hits with it as well as the type of that damage.

Properties. Any properties a weapon has are listed in the Properties column. Each property is defined in the "Properties" section.

Mastery. Each weapon has a mastery property, which is defined in the "Mastery Properties" section. To use that property, you must have a feature that lets you use it.

SELLING EQUIPMENT

Equipment fetches half its cost when sold. In contrast, trade goods and valuables—like gems and art objects—retain their full value in the marketplace. "Magic Items" has prices for magic items.

Weapon Proficiency

Anyone can wield a weapon, but you must have proficiency with it to add your Proficiency Bonus to an attack roll you make with it. A player character's features can provide weapon proficiencies. A monster is proficient with any weapon in its stat block.

Properties

Here are definitions of the properties in the Properties column of the Weapons table.

Ammunition

You can use a weapon that has the Ammunition property to make a ranged attack only if you have ammunition to fire from it. The type of ammunition required is specified with the weapon's range. Each attack expends one piece of ammunition. Drawing the ammunition is part of the attack (you need a free hand to load a one-handed weapon). After a fight, you can spend 1 minute to recover half the ammunition (round down) you used in the fight; the rest is lost.

Finesse

When making an attack with a Finesse weapon, use your choice of your Strength or Dexterity modifier for the attack and damage rolls. You must use the same modifier for both rolls.

Heavy

You have Disadvantage on attack rolls with a Heavy weapon if it's a Melee weapon and your Strength score isn't at least 13 or if it's a Ranged weapon and your Dexterity score isn't at least 13.

Light

When you take the Attack action on your turn and attack with a Light weapon, you can make one extra attack as a Bonus Action later on the same turn. That extra attack must be made with a different Light weapon, and you don't add your ability modifier to the extra attack's damage unless that modifier is negative. For example, you can attack with a Shortsword in one hand and a Dagger in the other using the Attack action and a Bonus Action, but you don't add your Strength or Dexterity modifier to the damage roll of the Bonus Action unless that modifier is negative.

Loading

You can fire only one piece of ammunition from a Loading weapon when you use an action, a Bonus Action, or a Reaction to fire it, regardless of the number of attacks you can normally make.

Range

A Range weapon has a range in parentheses after the Ammunition or Thrown property. The range lists two numbers. The first is the weapon's normal range in feet, and the second is the weapon's long range. When attacking a target beyond normal range, you have Disadvantage on the attack roll. You can't attack a target beyond the long range.

Reach

A Reach weapon adds 5 feet to your reach when you attack with it, as well as when determining your reach for Opportunity Attacks with it.

Thrown

If a weapon has the Thrown property, you can throw the weapon to make a ranged attack, and you can draw that weapon as part of the attack. If the weapon is a Melee weapon, use the same ability modifier for the attack and damage rolls that you use for a melee attack with that weapon.

Two-Handed

A Two-Handed weapon requires two hands when you attack with it.

Versatile

A Versatile weapon can be used with one or two hands. A damage value in parentheses appears with the property. The weapon deals that damage when used with two hands to make a melee attack.

Mastery Properties

Each weapon has a mastery property, which is usable only by a character who has a feature, such as Weapon Mastery, that unlocks the property for the character. The properties are defined below.

IMPROVISED WEAPONS

If you use an object—such as a table leg, frying pan, or bottle—as a makeshift weapon, see “Improvised Weapons” in “Rules Glossary.” Also see those rules if you wield a weapon in an unusual way, such as using a Ranged weapon to make a melee attack.

Cleave

If you hit a creature with a melee attack roll using this weapon, you can make a melee attack roll with the weapon against a second creature within 5 feet of the first that is also within your reach. On a hit, the second creature takes the weapon's damage, but don't add your ability modifier to that damage unless that modifier is negative. You can make this extra attack only once per turn.

Graze

If your attack roll with this weapon misses a creature, you can deal damage to that creature equal to the ability modifier you used to make the attack roll. This damage is the same type dealt by the weapon, and the damage can be increased only by increasing the ability modifier.

Nick

When you make the extra attack of the Light property, you can make it as part of the Attack action instead of as a Bonus Action. You can make this extra attack only once per turn.

Push

If you hit a creature with this weapon, you can push the creature up to 10 feet straight away from yourself if it is Large or smaller.

Sap

If you hit a creature with this weapon, that creature has Disadvantage on its next attack roll before the start of your next turn.

Slow

If you hit a creature with this weapon and deal damage to it, you can reduce its Speed by 10 feet until the start of your next turn. If the creature is hit more than once by weapons that have this property, the Speed reduction doesn't exceed 10 feet.

Topple

If you hit a creature with this weapon, you can force the creature to make a Constitution saving throw (DC 8 plus the ability modifier used to make the attack roll and your Proficiency Bonus). On a failed save, the creature has the Prone condition.

Vex

If you hit a creature with this weapon and deal damage to the creature, you have Advantage on your next attack roll against that creature before the end of your next turn.

Armor

The Armor table lists the game's main armor. The table includes the cost and weight of armor, as well as the following details:

Category. Every type of armor falls into a category: Light, Medium, or Heavy. The category determines how long it takes to don or doff the armor (as shown in the table).

Armor Class (AC). The table's Armor Class column tells you what your base AC is when you wear a type of armor. For example, if you wear Leather Armor, your base AC is 11 plus your Dexterity modifier, whereas your AC is 16 in Chain Mail.

Strength. If the table shows a Strength score in the Strength column for an armor type, that armor reduces the wearer's speed by 10 feet unless the wearer has a Strength score equal to or higher than the listed score.

Stealth. If the table shows "Disadvantage" in the Stealth column for an armor type, the wearer has Disadvantage on Dexterity (Stealth) checks.

Armor Training

Anyone can don armor or hold a Shield, but only those with training can use them effectively, as explained below. A character's class and other features determine the character's armor training. A monster has training with any armor in its stat block.

Light, Medium, or Heavy Armor

If you wear Light, Medium, or Heavy armor and lack training with it, you have Disadvantage on any D20 Test that involves Strength or Dexterity, and you can't cast spells.

Shield

You gain the Armor Class benefit of a Shield only if you have training with it.

One at a Time

A creature can wear only one suit of armor at a time and wield only one Shield at a time.

Large Vehicles

The Airborne and Waterborne Vehicles table provides statistics for various types of large vehicles. The following notes apply.

Speed

A ship sailing against a strong wind moves at half speed. In a dead calm (no wind), waterborne ships can't move under sail and must be rowed. Keelboats and Rowboats are used on lakes and rivers. If going downstream, add the speed of the current (typically 3 miles per hour) to the speed of the vehicle. These vehicles can't be rowed against any significant current, but they can be pulled upstream by draft animals on the shores. A Rowboat can be carried and weighs 100 pounds.

Airborne and Waterborne Vehicles

Ship	Speed	Crew	Passengers	Cargo (Tons)	AC	HP	Damage Threshold	Cost
Airship	8 mph	10	20	1	13	300	—	40,000 GP
Galley	4 mph	80	—	150	15	500	20	30,000 GP
Keelboat	1 mph	1	6	1/2	15	100	10	3,000 GP
Longship	3 mph	40	150	10	15	300	15	10,000 GP
Rowboat	1½ mph	1	3	—	11	50	—	50 GP
Sailing Ship	2 mph	20	20	100	15	300	15	10,000 GP
Warship	2½ mph	60	60	200	15	500	20	25,000 GP

Crew

A ship larger than a Keelboat or Rowboat needs a crew of skilled hirelings (see “Hirelings” later in “Equipment”) to function. The minimum number of skilled hirelings needed to crew a ship depends on the type of ship, as shown in the table.

Passengers

The table lists the number of Small and Medium passengers the ship can accommodate using hammocks. A ship outfitted with private accommodations can carry one-fifth as many passengers. A passenger usually pays 5 SP per day for a hammock, but prices can vary from ship to ship. A small private cabin usually costs 2 GP per day.

Damage Threshold

If a vehicle has a damage threshold (see “Rules Glossary”), it’s noted in the table.

Ship Repair

Repairs to a damaged ship can be made while the vessel is berthed. Repairing 1 Hit Point of damage requires 1 day and costs 20 GP for materials and labor. If the repairs are made in a location where supplies and skilled labor are abundant, such as a city shipyard, the repair time and cost are halved.

Lifestyle Expenses

Lifestyle expenses summarize the cost of living in a fantasy world. They cover lodging, food, equipment maintenance, and other necessities.

At the start of each week or month (GM’s choice), choose a lifestyle below—Wretched, Squalid, Poor, Modest, Comfortable, Wealthy, or Aristocratic—and pay the price to sustain that lifestyle.

Lifestyles have no inherent consequences, but the GM might take them into account when determining risks or how others perceive your character.

Wretched (Free)

You survive via chance and charity. You’re often exposed to natural dangers as a result of sleeping outside.

Squalid (1 SP per Day)

You spend the bare minimum for your necessities. You might be exposed to unhealthy conditions and opportunistic criminals.

Poor (2 SP per Day)

You spend frugally for your necessities.

Modest (1 GP per Day)

You support yourself at an average level.

Comfortable (2 GP per Day)

You spend modestly for your necessities and enjoy a few luxuries.

Wealthy (4 GP per Day)

You’re accustomed to the finer things in life and might have servants.

Aristocratic (10 GP per Day)

You pay for the best and might have a staff that supports your lifestyle. Others notice your wealth and might encourage you to share it, either legally or otherwise.

Food, Drink, and Lodging

The Food, Drink, and Lodging table gives prices for food and a single night’s lodging. Prices for daily lodging and meals are included in your lifestyle’s expenses.

Food, Drink, and Lodging

Item	Cost	Item	Cost
Ale (mug)	4 CP	Comfortable	8 SP
Bread (loaf)	2 CP	Wealthy	2 GP
Cheese (wedge)	1 SP	Aristocratic	4 GP
Inn Stay per Day		Meal	
Squalid	7 CP	Squalid	1 CP
Poor	1 SP	Poor	2 CP
Modest	5 SP	Modest	1 SP

Hirelings

Skilled hirelings include anyone hired to perform a service that involves a proficiency (including weapon, tool, or skill): a mercenary, an artisan, a scribe, or the like. The pay shown on the Hirelings table is a minimum; some expert hirelings require more pay. Untrained hirelings are hired for work that requires no particular proficiencies; they include laborers and porters.

Hirelings

Service	Cost
Skilled hireling	2 GP per day
Untrained hireling	2 SP per day
Messenger	2 CP per mile

Spellcasting

Most settlements contain individuals who are willing to cast spells in exchange for payment. If a spell has expensive components, add the cost of those components to the cost listed in the Spellcasting Services table. The higher the level of a desired spell, the harder it is to find someone to cast it.

Spellcasting Services

Spell Level	Availability	Cost
Cantrip	Village, town, or city	30 GP
1	Village, town, or city	50 GP
2	Village, town, or city	200 GP
3	Town or city only	300 GP
4–5	Town or city only	2,000 GP
6–8	City only	20,000 GP
9	City only	100,000 GP

Magic Items

Adventures hold the promise—but not a guarantee—of finding magic items. Hundreds of magic items are detailed in “Magic Items” later in this document. Here’s what you need to know about using magic items.

Identifying a Magic Item

Some magic items are indistinguishable from their nonmagical counterparts, while others are conspicuously magical. Handling a magic item is enough to

give you a sense that it is extraordinary, but learning a magic item’s properties isn’t automatic.

The *Identify* spell is the fastest way to reveal an item’s properties. Alternatively, you can focus on one magic item during a Short Rest while being in physical contact with the item. At the end of the rest, you learn its properties and how to use them (but not any curse the item might bear).

Sometimes a magic item carries a clue to its properties. The command word to activate a ring might be etched inside the band, or a feathered design might hint that it’s a *Ring of Feather Falling*.

Wearing or experimenting with an item can also offer hints about its properties. In the specific case of Potions, a little taste is enough to tell the taster what a potion does. Other items might require more experimentation. For example, if your character puts on a *Ring of Swimming*, the GM might say, “Your movement feels strangely fluid.” Perhaps you then dive into a river to see what happens. The GM would then say you swim unexpectedly well.

Attunement

Some magic items require a creature to form a bond—called Attunement—with them before the creature can use an item’s magical properties. Without becoming attuned to an item that requires Attunement, you gain only its nonmagical benefits unless its description states otherwise. For example, a magic Shield that requires Attunement provides the benefits of a normal Shield if you aren’t attuned to it, but none of its magical properties.

Attune during a Short Rest

Attuning to an item requires you to spend a Short Rest focused on only that item while being in physical contact with it (this can’t be the same Short Rest used to learn the item’s properties). This focus can take the form of weapon practice (for a Weapon), meditation (for a Wand), or some other appropriate activity. If the Short Rest is interrupted, the Attunement attempt fails. Otherwise, at the end of the Short Rest, you’re attuned to the magic item and can access its full magical capabilities.

No More Than Three Items

You can be attuned to no more than three magic items at a time. Any attempt to attune to a fourth item fails; you must end your Attunement to an item first. Additionally, you can’t attune to more than one copy of an item. For example, you can’t attune to more than one *Ring of Protection* at a time.

Ending Attunement

Your Attunement to an item ends if you no longer satisfy the prerequisites for Attunement, if the item has been more than 100 feet away for at least 24 hours, if you die, or if another creature attunes to
